(Searching: Business Source Premier, EconLit)

No results were found.

You may want to try your search again after following one or more of these tips:

- Check the spelling of your search terms. Correct any misspellings and re-run the search.
- To broaden your search, use the Boolean operator OR. For example, type: Siamese OR cats.

Agenda

Does meta-consulting exist?

What is the overall idea of meta-consulting?

Why do meta-consultancies exist?

What do meta-consultancies do?

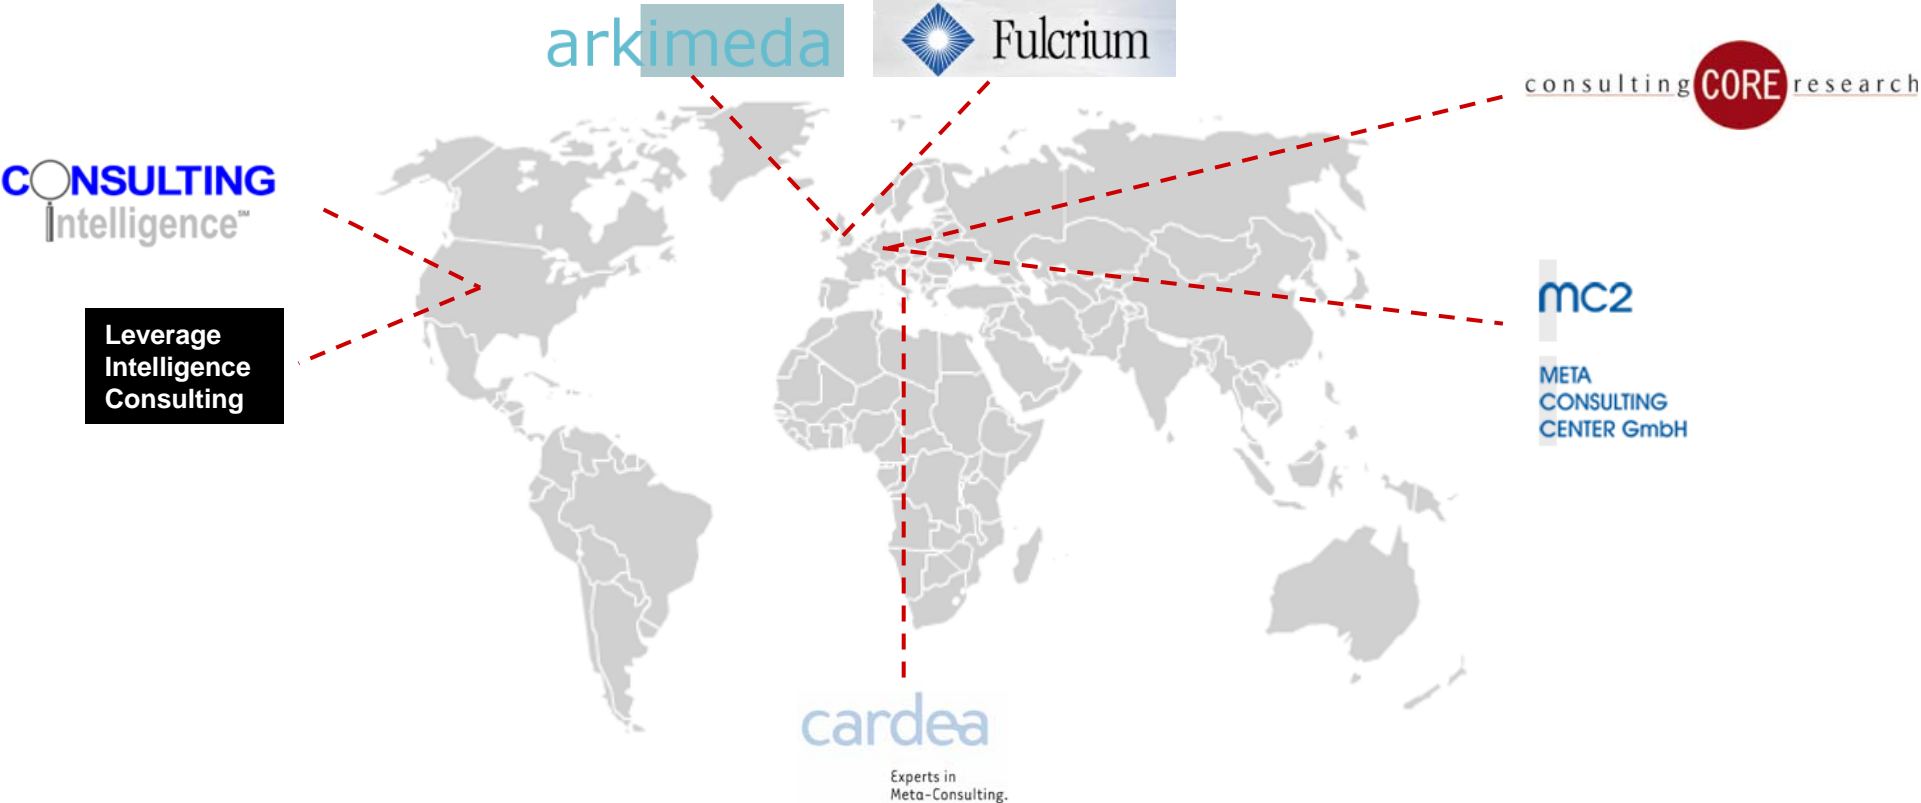

What are the limitations of meta-consultancies?

Is the model of meta-consulting able to survive?

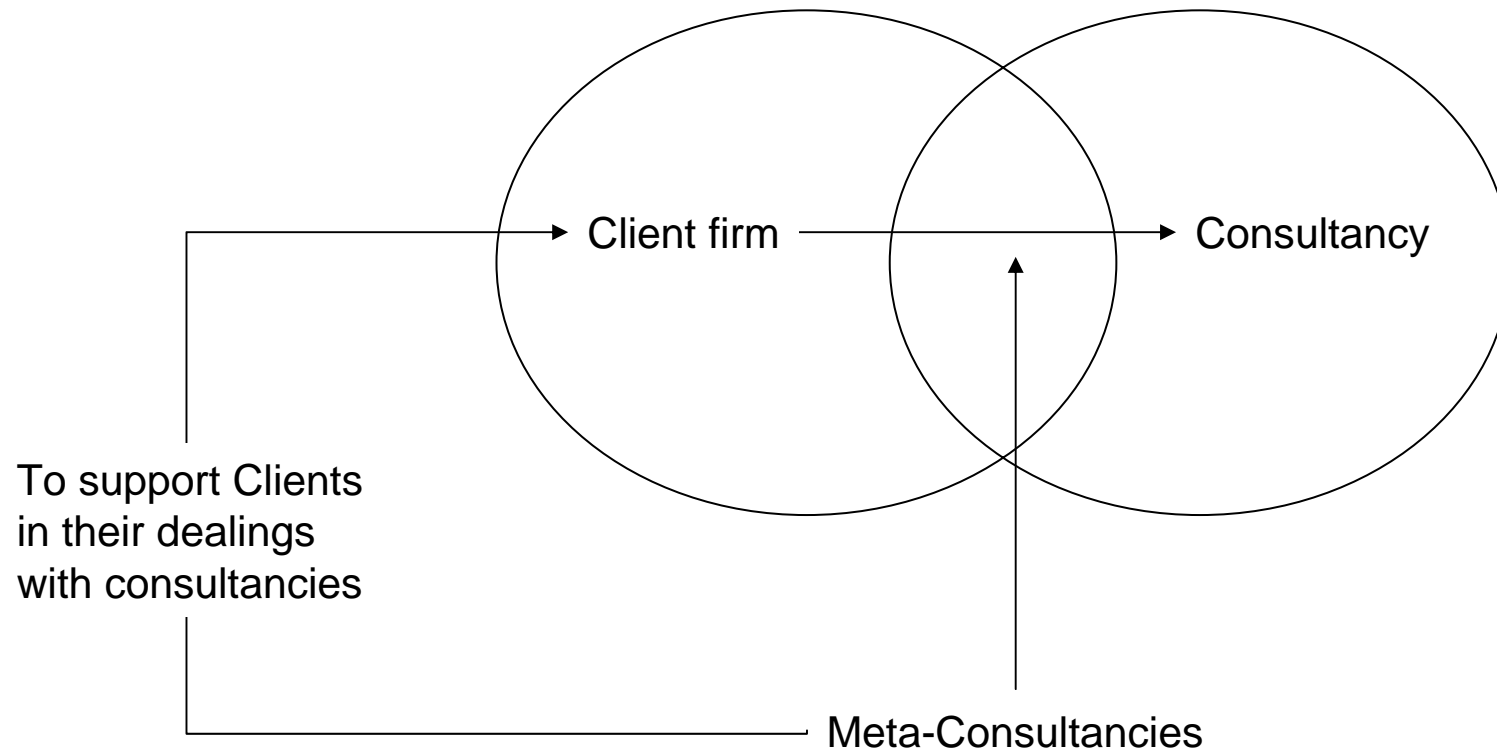

Does meta-consulting exist?

„There is even a market [...] regarding ‘how to handle consultants’ – meta-consultancy. Is this ever going to stop?”

(Sorge & van Witteloostuijn 2004, p. 1208)

What is the overall idea of meta-consulting?

Aims:

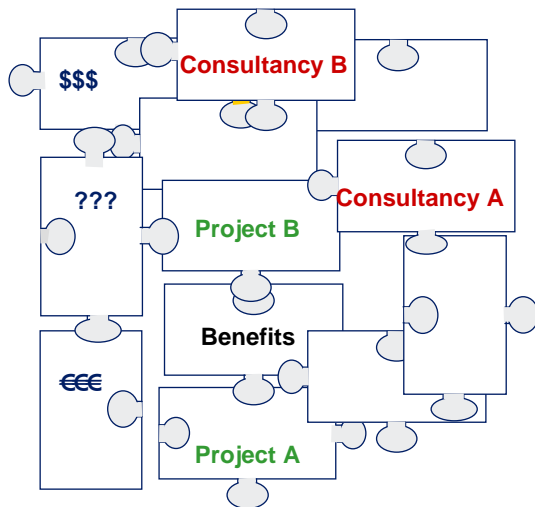

- to increase the transparency of a client firm's internal consulting landscape,
- to reduce their consulting expenses, and
- to maximize the overall usefulness of consulting (Brown 2007; Gloger 2006; Mohe 2006)

Why do meta-consultancies exist? (1)

a) Intransparency of the consulting market

- „Uncertainty about the sustainability of the consulting firm, its professional background and status, and the qualification of its staff leads to a reduction in market transparency” (Glückler & Armbrüster 2003)
- MC is not a profession in the classical sense (Fincham 2006; Gross & Kieser 2006); no standards, no reliable criteria for clients

b) Intransparency of the internal consulting landscape of client firms

- Consulting firms?
- Reasons for engaging consultancies?
- Consulting costs?
- Benefits of consulting projects?

- 75% of managers evaluate the internal consulting landscape of their company as intransparent
- “pell-mell,” “chaotic,” or a “consultants’ nuisance” (Mohe & Höner 2006).

Why do meta-consultancies exist? (2)

c) Failed consulting projects

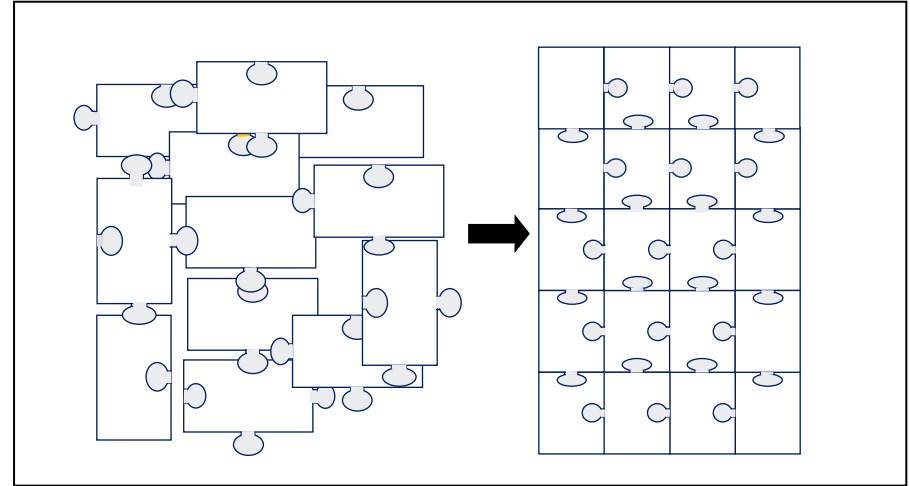

- 60 percent rated the project as quite unsuccessful or just moderately successful (Appelbaum & Steed 2005)
- Failure rate between 25 and 50 percent (Czander 2001)
- 80 percent of all consulting interventions fail (Zackrisson & Freedman 2003)
- “Maximizing the benefits that consultants can bring is never going to be a one-sided process: it’s absolutely true that there are many areas where consultants can be criticized, but it’s equally true that the way clients sometimes behave makes the situation worse” (Czerniawska 2005, p. 4)
- “The way in which management consultants are purchased and managed is far from efficient” (Werr & Perner 2005, p. B5; Czerniawska 2002; 2003; Mohe 2005).
- Pressure on management from (internal and external) stakeholders to demonstrate its “professional” conduct towards consultancy.
- Some client firms have already developed an awareness of dealing more professionally with consultancies (Bäcklund & Werr 2005; Haferkamp & Drescher 2006; Lindberg & Furusten 2005; Mohe & Höner 2006; Mohe 2005; Reifenscheidt 2007; Werr & Perner 2005; 2007).

What do meta-consultancies do?

Providing orientation and acting as a broker

The screenshot shows the Cardea database website. At the top left is the logo "cardea database". To the right, the text reads: "Unsere Hilfestellung bei der Suche und Auswahl der passenden Berater" and "Verschaffen Sie sich selbst einen Überblick über herausragende Beratungsfür Sie reelle Projekte mit geprüften Referenzen." Below this are four search buttons: "Suchen nach Beratungsdiensten", "Suchen nach Beraterrollen", "Suchen nach Branchen", and "alphabetischer Index".

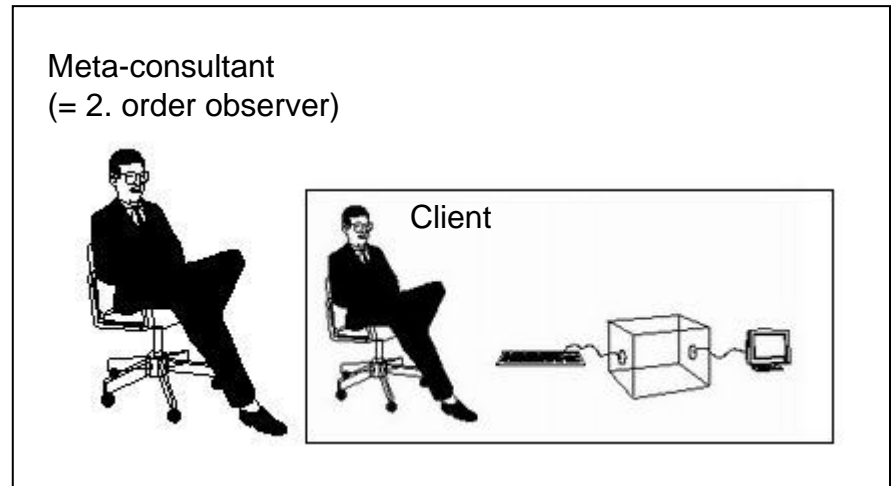

Controlling and clearing

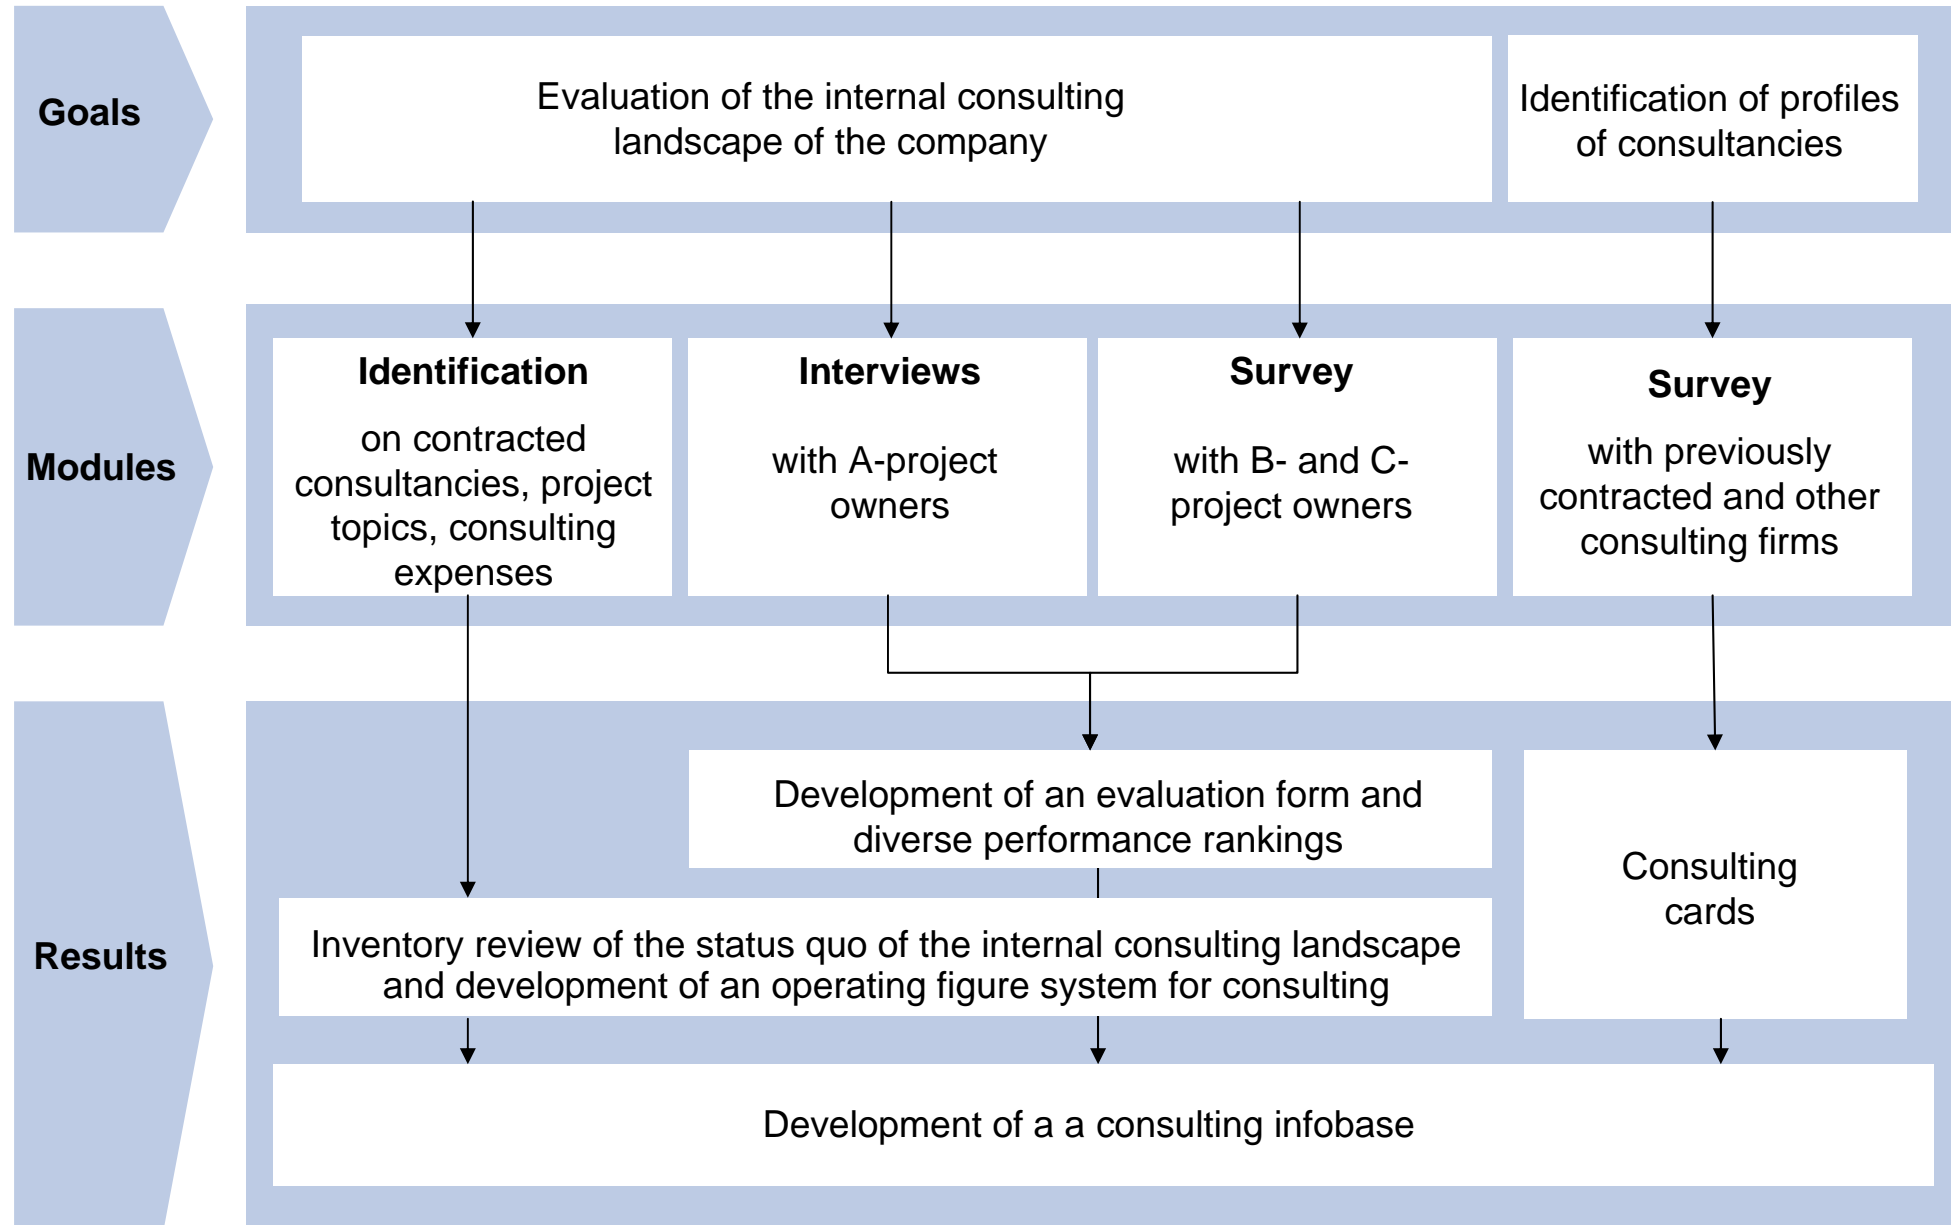

Coaching and moderating

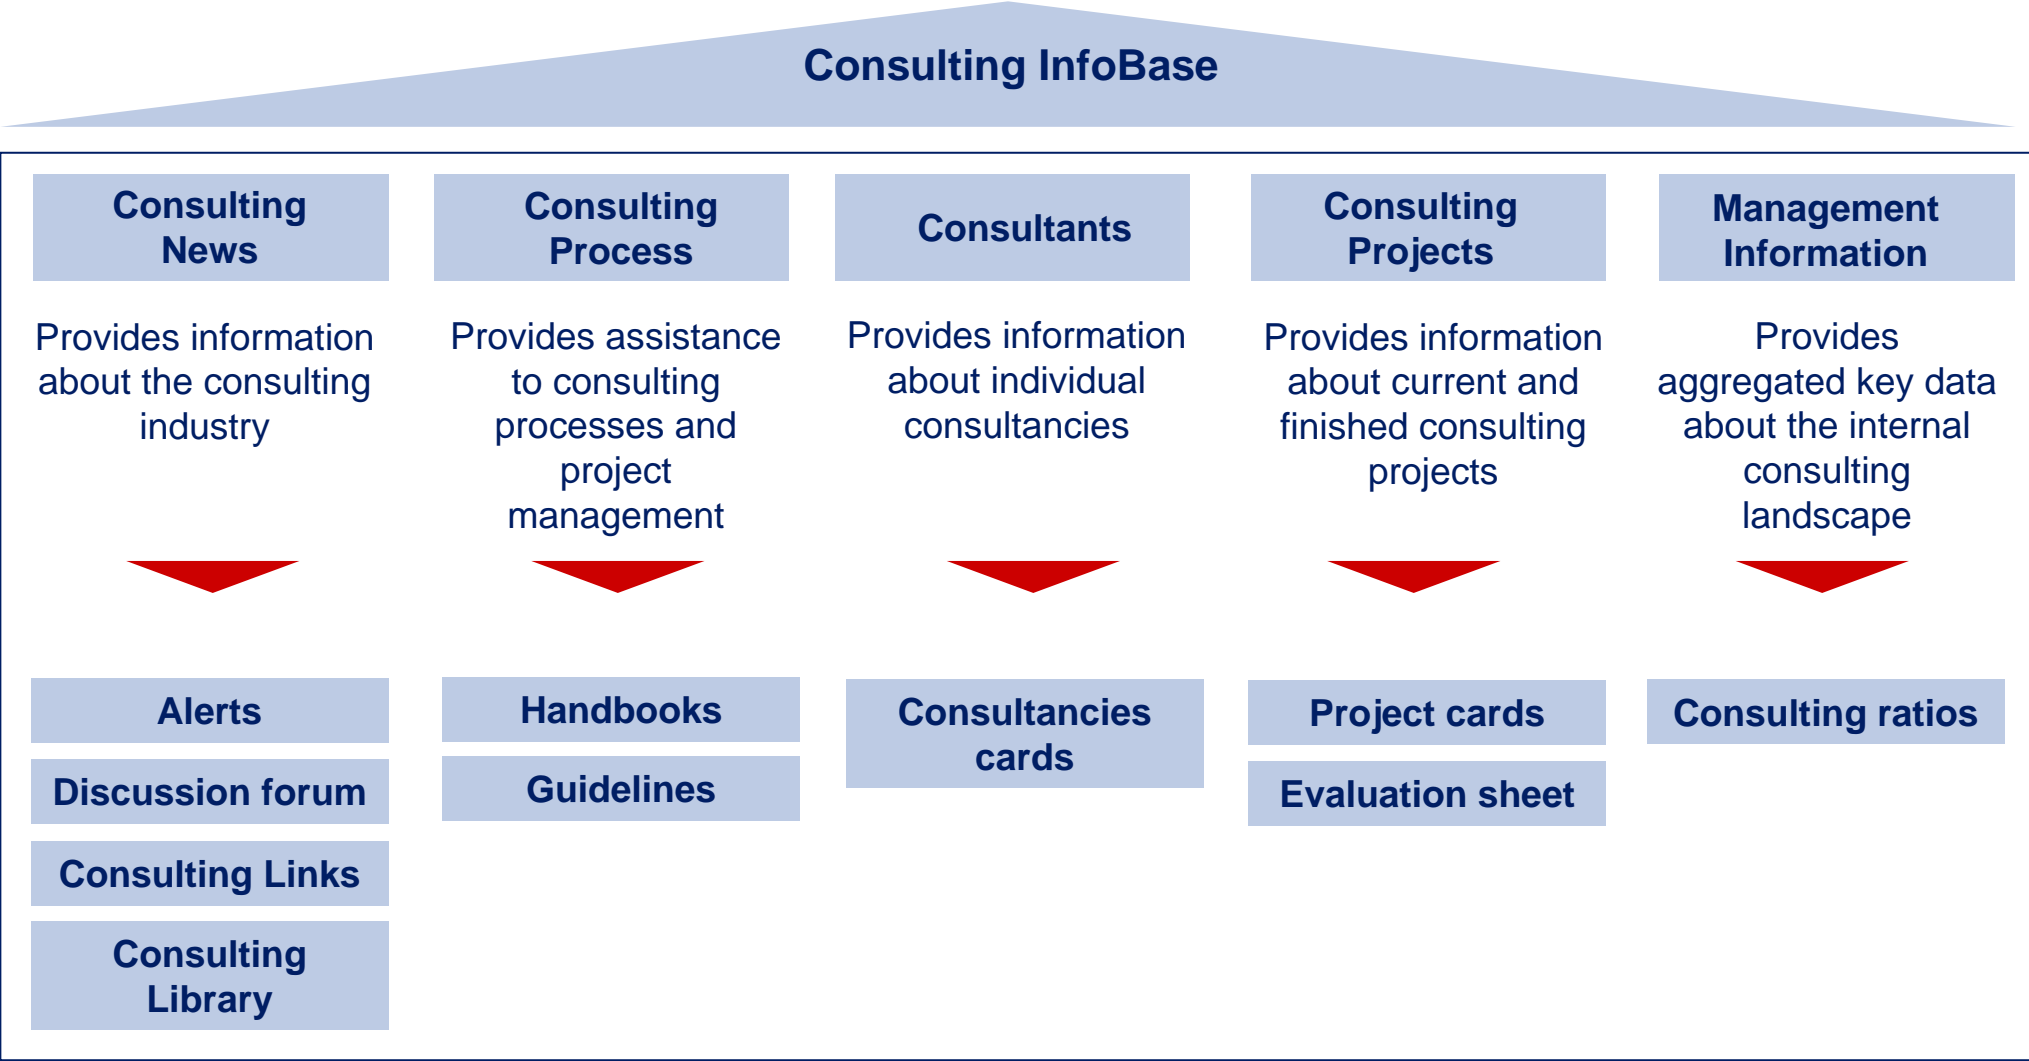

Observing and promoting reflection

Excursus: design of a concrete project

Excursus: DaimlerChrysler's consulting infobase

(Mohe et al. 2006)

Excursus: Demo Version (Screenshot)*

The screenshot shows a web application interface with a navigation menu on the left and a main content area. The navigation menu includes 'Overview', 'Search', and 'New'. The main content area is titled 'CSD - Overview' and contains a table of consultants. A 'New' button is circled in red. The date '10.12.2004' is displayed in the top right corner.

*Data are exemplarily

What are the limitations of meta-consultancies?

The Crux of meta-expertise

- Neither the client nor the meta-consultant can really know what the consultant knows
- Both clients and meta-consultants share the same problem as they cannot evaluate a priori the knowledge that the consultant claims to possess (cf. Kieser 2002; Starbuck 1992)

Infinite regress

„Even if another expert were employed to evaluate the consultant, who is to say that his evaluation is correct?“ (Mitchell 1984)

Illusion of Rationality

- Managers try to create the impression that their dealings with consultancies are based on rationality.
- The engagement of a meta-consultancy may help to build up “facades of rationality” (Nyström & Starbuck 1984).
- The pure claim of having engaged “objective and professional” meta-consultants helps to suppress any suspicions of careless use of consultants and to create a sense of immunity to criticism.

Counteracting the „real“ motives of the client

- Latent/unofficial functions can only be fulfilled if they remain hidden from the audience
- Questionable whether clients really want more transparency in their consulting activities.
- The meta-consultant’s aim of increasing the transparency of the internal consulting landscape could counteract the “real” motives of clients.

Is the model of meta-consulting able to survive?

Situation	Percentage
Build up expertise in dealing more professionally with consultancies	58 %
Post-process and evaluate consulting projects	51 %
Support the process of selection of consultants and contract negotiations	37%
Support in cases of problems arising during a consulting project	21%

(ManagerSeminare 2006)

Pro's

- client companies foster an awareness of the need to deal more “professionally” with consultancies, and make an effort towards that end
- the trend for rather anonymous, arm’s-length relationships (Richter 2004; Werr & Styhre 2003) continues
- client companies purchase more standardized consulting services (or: consulting services as a “commodity”, cf. Kipping 2002)

Con's

- managers prefer close relationships with certain consultants (“repeat business”, cf. Glückler & Armbrüster 2003)
- managers perceive meta-consulting as a controlling body for their consulting activities
- client companies develop their own meta-consultancies, and build the required capacities and competencies needed for these in house (Haferkamp & Drescher 2006; Robker 2004).
