

# Information letter for the replacement of refrigeration units

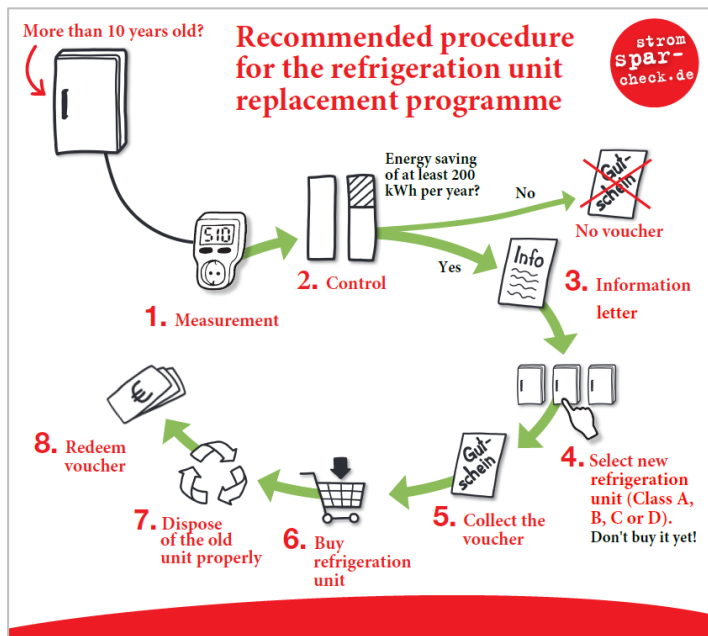

(Not yet the voucher)

You have received an energy savings check (Check ID \_\_\_\_\_). You are now able to obtain a voucher to buy a new, high-efficiency refrigeration unit from 1 April 2023 up until February 2026.

Without replacement,    you lose around \_\_\_\_ euros! 😞

- Your new refrigeration unit must have an energy efficiency label of class **A, B, C or D** and must consume a **maximum of \_\_\_\_ kWh per year**.
- If you replace your old refrigeration unit, you can receive a **voucher for \_\_\_\_ euros**.
- Using your voucher:
  - Your voucher will be valid for two months and **CANNOT** be extended. You should therefore choose a new refrigeration unit **BEFORE** obtaining a voucher from our project location.
  - The purchase date of the new refrigeration unit must fall within the voucher's period of validity.
  - No payments can be made in excess of the purchase price of the refrigeration unit. The voucher does not cover any transport or delivery costs that incur.
- Your old refrigeration unit must be properly and verifiably **disposed of**.
- You must bring the following with you for receiving the payout:
  - Voucher
  - Original copy of the certificate of disposal, or a receipt
  - Original copy of the proof of purchase (invoice) for the new refrigeration unit
  - Energy efficiency label (sticker) for the new refrigeration unit (A, B, C or D)
  - Passport or ID card

If you have any questions about exchanging your refrigeration unit, please call our project location or pay it a visit.
