Wirtschaftsforschung GmbH

Centre for European  
Economic Research

## ***Leibniz Network***

### ***Noncognitive Skills: Acquisition and Economic Consequences***

**Multidisciplinary analyses of non-cognitive skill formation during the life cycle.  
What are the important supporting factors and what are the main causes for sub-optimal investments?**

**Are there sensitive stages and influences?**

**Methods to measure non-cognitive skills and their acquisition.**

**Consequences of non-cognitive skills for the formation of cognitive skills, school and labour market success.**

**Economic and psychological benefits from investments in non-cognitive skills dependent on child age and cognitive skills.**

**We gratefully acknowledge support from the Leibniz Association in the Research Network**
