

## Call for Papers

# 16<sup>th</sup> Ph.D. Workshop on International Climate Policy

**Centre for European Economic Research (ZEW),  
Mannheim, Germany, May 1<sup>st</sup> and 2<sup>nd</sup>, 2008**

The workshop is organised by the European Ph.D. network on International Climate Policy. This independent scientific community is open to Ph.D. students and researchers from all disciplines working on aspects of International Climate Policy. As a vital part of the network, the Ph.D. candidates meet twice a year for a workshop which gives them the opportunity to present their theses and discuss them with other Ph.D. students and researchers working in the area of climate policy.

**Contributions of Ph.D. students to the following (or related) topics are encouraged:**

- Post-Kyoto climate regime
- Market-based instruments of climate policy
- Energy, technology, and environmental policy
- Adaptation to climate change

Participation in the workshop is not limited to paper presenters. You will however be encouraged to discuss a presentation of a fellow participant. The organisation and financial coverage of any expenses for travelling and overnight stays have to be covered by the participants. There is no workshop participation fee.

Please send your paper submissions as a PDF file (if you intend to present work in progress, you may send a long abstract) per email to the ZEW team (see contact details below). Deadline for submissions and workshop registration is March 31, 2008 ([please register online at the workshop website](#)).

The workshop will be hosted by the Centre for European Economic Research (ZEW) in Mannheim. The ZEW works in the field of applied empirical economic research. As a non-profit economic research institute, it takes a predominantly microeconomic and microeconomic research approach and co-operates closely with other scientific disciplines. The ZEW Department of Environmental and Resource Economics, Environmental Management is conducting research in the fields of Energy Economics, Macroeconomic Analysis of Environmentally Relevant Policies, Innovation and Sustainable Development, International Environmental and Resource Policies, and Transport and Mobility.

We are looking forward to welcoming you in Mannheim this spring!

The ZEW organising team: Victoria Alexeeva-Talebi, Niels Anger and Ulrich Oberndorfer

All information regarding the workshop is available at the website:
